Dedicated to manufacturing premium stands for the professional studio musician, DR Pro is your assurance of superior performance and value. Built to surpass industry standards, our support gear is strong, lightweight, and uses a durable power-coated finish, tougher tubing, and precision mechanical parts that are a cut above the competition.

Plus, our industry standard designs make it easy to integrate our products into any studio or stage environment.

### DR210: Telescopic Boom Arm Mic Stand

- Steel clutch tightens easily and stays in place
- Removable boom arm for maximum flexibility
- Fully adjustable length and angle
- Tripod base with reinforced housing

Designed to give you a myriad of mic placement options, the DR210 stand allows you to find the optimal sonic "sweet spot" in any recording or performance situation. Now you can make the most of your "space" with a professional mic stand that's been engineered to last for years under heavy use.

### DR259: Low Profile Mic Boom Stand

- Low profile stand with tripod base for stability and flexible positioning
- Boom arm
- Heavy-duty steel-tube body & legs withstand the rigors of night-after-night touring
- Precision machined with nickel and brass fittings

When you want to record kick drums, guitar or bass amps, or any instrument that requires specialized mic placement, the DR259 is the mic stand of choice. It's a pro-grade telescoping boom stand that's ideal for certain mic'ing situations that are beyond the scope of ordinary stands. It'll quickly become your most versatile piece of gear on stage or in studio.
